The Only Proofreading Enzyme Guaranteed For PCR.

For cloning applications requiring high fidelity PCR, the new Ultma™ DNA Polymerase corrects misincorporations and prevents misextensions while maintaining amplification efficiency.

Derived from Thermotoga maritima, Ultma DNA Polymerase is genetically engineered to achieve an optimal balance between proofreading and polymerase activities. Extensive studies in our labs have resulted in a proven enzyme with well-documented, optimized protocols for your most demanding PCR application.

Ultma DNA Polymerase. Another innovation from Perkin-Elmer and the latest addition to our growing family of PCR enzymes. All backed by our PCR Performance Guarantee. In the U.S., call PE XPRESS at 1-800-762-4002 to order. Or call 1-800-762-4001 for technical information. Outside the U.S., contact your Perkin-Elmer representative.

Perkin-Elmer is a registered trademark of The Perkin-Elmer Corporation. Ultma is a trademark of Roche Molecular Systems, Inc. The GeneAmp PCR process is covered by U.S. patents owned by Hoffmann-La Roche Inc. and Hoffmann-La Roche Ltd.
