MOLECULAR RESEARCH CENTER, INC. presents

SMART SOLUTIONS

The most reliable and cost-effective reagents for DNA and RNA isolations. Using separation technology based on the recognition of target molecules by a liquid phase, these innovative reagents outperform traditional DNA and RNA isolation methods. No enzymatic treatments! No columns! No prolonged protocols!

DNAzol™, a new standard of simplicity and effectiveness in the isolation of high quality genomic DNA, developed by P. Chomczynski.

- Requires only 10 - 30 minutes
- Effective with cells, tissue and liquid samples, including blood.
- No phenol or other toxic agents
- Isolated DNA is ready for Southern blotting, restriction analysis, PCR, molecular cloning and other applications.

TRI REAGENT®, the most advanced version of the single-step method of RNA isolation.

- Isolates high quality total RNA in less than one hour
- Can be used to simultaneously isolate RNA, DNA and proteins
- Effective with cells, tissue and liquid samples, including blood.
- Isolated RNA is ready for Northern blotting, RT-PCR, and other applications.

For information or to place an order from USA, Canada and countries not listed below call 1-800 462-9868, 513-841-0900 or Fax 513-841-0080.
