February, 1993
Volume 2, Number 3

REVIEW

- 185 rPCR: A Powerful Tool for Random Amplification of Whole RNA Sequences**
Patrick Froussard
- 191 Quantitative PCR and RT-PCR in Virology**
Massimo Clementi, Stefano Menzo, Patrizia Bagnarelli, Aldo Manzin, Anna Valenza, and Pietro E. Varaldo

RESEARCH

- 197 Genome Walking with 2- to 4-kb Steps Using Panhandle PCR**
Douglas H. Jones and Stanley C. Winistorfer
- 204 Simplified Construction of a Subtracted cDNA Library Using Asymmetric PCR**
Gunnar Houge
- 210 Mutagenic Oligonucleotide-directed PCR Amplification (Mod-PCR): An Efficient Method for Generating Random Base Substitution Mutations in a DNA Sequence Element**
Lillian W. Chiang, Iulia Kovari, and Martha M. Howe
- 218 PCR Amplification of SRY-related Gene Sequences Reveals Evolutionary Conservation of the SRY-box Motif**
Ann-Marie Coriat, Ulrike Müller, Jenny L. Harry, Dafe Uwanogho, and Paul T. Sharpe
- 223 Synthesis and Characterization of 5'-Fluorescent-dye-labeled Oligonucleotides**
William G. Giusti and Theresa Adriano
- 228 Partial Endonuclease Digestion Mapping of Restriction Sites Using PCR-amplified DNA**
Juan Carlos Morales, John C. Patton, and John W. Bickham
- 234 PCR Buffer Optimization with Uniform Temperature Regimen to Facilitate Automation**
M.M. Blanchard, P. Taillon-Miller, P. Notwotny, and V. Nowotny
- 241 An Improved Method for the Detection of Hepatitis C Virus RNA in Plasma Utilizing Heminested Primers and Internal Control RNA**
Paul P. Ulrich, Joseph M. Romeo, Lynton J. Daniel, and Girish N. Vyas
- 250 Sensitive Two-stage PCR of p53 Genomic DNA Exons 5-9**
Wolfgang C. Kusser, David B. Levin, and Barry W. Glickman

TECHNICAL TIPS

- 253 Unwanted Mutations in PCR Mutagenesis: Avoiding the Predictable**
Kelly D. Smith, Alicia Valenzuela, Janet L. Vigna, Kim Aalbers, and Charles T. Lutz
- 258 Differential Detection of Colinear Genes and RNA Transcripts by Modified Reverse Transcription and PCR**
Christina Falcinelli, Leen-Jan van Doorn, Alex van Belkum, and Wim Quint
- 261 Rapid Preparation of Limited Biological Samples for Small-Volume PCR**
B.A. Neilan, A. Gurvita, D.A. Leigh, L.Y.C. Lai, and B. McDonald
