

METHODS • AND • APPLICATIONS

**Associate Editors**

David Bentley  
Guy's Hospital, London  
Richard Gibbs  
Baylor College of Medicine  
Eric Green  
Washington University School of Medicine  
Richard Myers  
University of California, San Francisco

**Editorial Board**

Rakesh Anand  
ICI Pharmaceuticals  
Johannes Bos  
University of Utrecht  
David Botstein  
Stanford University School of Medicine  
Jeff Chamberlain  
University of Michigan Medical School  
Nicholas Dracopoli  
Massachusetts Institute of Technology  
Joe Ecker  
University of Pennsylvania  
Henry Erlich  
Roche Molecular Systems  
Kenshi Hayashi  
National Cancer Research Institute, Tokyo  
Bernhard Horsthemke  
University of Essen  
Pieter de Jong  
Lawrence Livermore National Laboratory  
David Kemp  
Menzies School of Health Research  
Kenneth Kidd  
Yale University School of Medicine  
Ulf Landegren  
University of Uppsala Medical Center  
Eric Lander  
Whitehead Institute of Medical Research  
Hans Lehrach  
Imperial Cancer Research Fund  
Kary Mullis  
La Jolla, California  
David Nelson  
Baylor College of Medicine  
Debbie Nickerson  
University of Washington School of Medicine  
Svante Pääbo  
University of Munich  
Steve Sommer  
Mayo Foundation  
Eric Spitzer  
SUNY-Stony Brook  
Lap-Chee Tsui  
Hospital for Sick Children, Toronto  
James Weber  
Marshfield Medical Research Foundation  
Steven Wolinsky  
Northwestern University School of Medicine  
Mark Zoller  
Ariad Pharmaceuticals

**Editor**

Judy Cuddihy  
Cold Spring Harbor Laboratory

**Editorial Staff**

Doris Lawrence, Editorial/Production  
Secretary

Jim Suddaby, Design

May, 1993  
Volume 2, Number 4

**RESEARCH**

- 275 High-level Expression, Purification, and Enzymatic Characterization of Full-length *Thermus aquaticus* DNA Polymerase and a Truncated Form Deficient in 5' to 3' Exonuclease Activity**  
Frances C. Lawyer, Susanne Stoffel, Randall K. Saiki, Sheng-Yung Chang, Phoebe A. Landre, Richard D. Abramson, and David H. Gelfand
- 288 Predominant Mutations Induced by the *Thermococcus litoralis*, Vent DNA Polymerase during DNA Amplification In Vitro**  
Phouthone Keohavong, Lucy Ling, Cremilda Dias, and William G. Thilly
- 293 Rapid Characterization of HIV-1 Sequence Diversity Using Denaturing Gradient Gel Electrophoresis and Direct Automated DNA Sequencing of PCR Products**  
Björn Andersson, Ying Jia-Hsu, Dorothy E. Lewis, and Richard A. Gibbs
- 301 A PCR-derived Library of Random Point Mutations within the V3 Region of Simian Immunodeficiency Virus**  
Frank Kirchhoff and Ronald C. Desrosiers
- 305 Importance of Different Variables for Enhancing In Situ Detection of PCR-amplified DNA**  
Gerard J. Nuovo, Frances Gallery, Ruth Hom, Phyllis MacConnell, and Will Bloch
- 313 Determination of Allele Frequencies at Loci with Length Polymorphism by Quantitative Analysis of DNA Amplified from Pooled Samples**  
Päivi Pacek, Antti Sajantila, and Ann-Christine Syvänen
- 318 Restriction-site PCR: A Direct Method of Unknown Sequence Retrieval Adjacent to a Known Locus by Using Universal Primers**  
Gobinda Sarkar, Russell T. Turner, and Mark E. Bolander
- 323 Practical Application of the Fluorescence-based Image Analyzer for PCR-single-stranded Conformation Polymorphism Analysis Used in Detection of Multiple Point Mutations**  
Asako Takahashi-Fujii, Yoshizumi Ishino, Atsushi Shimada, and Ikunoshin Kato
- 328 Generation of Cohesive Ends on PCR Products by UDG-mediated Excision of dU, and Application for Cloning into Restriction Digest-linearized Vectors**  
Conrad Smith, Philip J.R. Day, and Matthew R. Walker
- 333 Detection of Bovine Leukemia Virus Proviral DNA in Individual Cells**  
Michael L. Mirsky, Yang Da, and Harris A. Lewin
- 341 Reproducibility of Random Amplified Polymorphic DNA (RAPD) Analysis among Laboratories**  
Greg A. Penner, Arla Bush, Roger Wise, Won Kim, Les Domier, Ken Kasha, Andre Laroche, Graham Scoles, Stephen J. Molnar, and George Fedak
- TECHNICAL TIPS**
- 346 PCR with Degenerate Primers Containing Deoxyinosine Fails with Pfu DNA Polymerase**  
Thomas Knittel and Didier Picard
- 348 A Rapid, Semiautomated Method for Apolipoprotein E Genotyping**  
C. Guo, P. Marynen, and J.J. Cassiman
