The authors would like to correct erroneous text relating to the *Step-by-step protocol of the best-performing DRIP experiment (exp. 5)* section in the Supplemental Material. The corrected text is as follows and has been updated in the Revised Supplemental Material online:

“Cells were lysed in the lysis buffer provided by the NucleoSpin Tissue kit (Macherey-Nagel) at 65°C for 7 h (according to the kit protocol), or at 37°C overnight (where indicated in the main text).”
