

Most Cited Journal in Its Field; Now Semimonthly

Genes & Development reports major advances of general interest and biological significance in molecular biology, molecular genetics, and related areas. The journal appears semimonthly and includes research papers and review articles.

Volume 8, 1994, containing 24 semimonthly issues

Individual Price (U.S.) \$115.00

Individual Price (R.O.W. airlift delivery) \$205.00

Student Price (U.S.) \$85.00*

Student Price (R.O.W. airlift delivery) \$165.00*

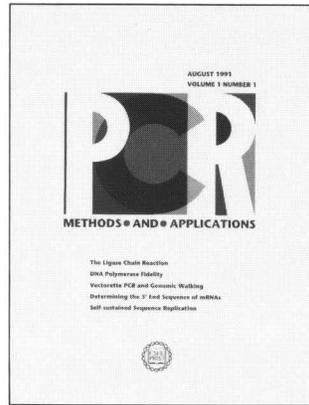

Institutional Price (U.S.) \$450

Institutional Price (R.O.W. airlift delivery) \$540

*Those who qualify must provide student I.D.

ISSN 0890-9369

New Journal in 1994!

Now Bimonthly

PCR Methods and Applications is devoted exclusively to amplification methods and their use. Its aim is to provide investigators in every discipline with a central source of reliable, independent, and up-to-date information about the principles and practice of amplification methods as well as their application.

Volume 3, 1993/94, containing 6 bimonthly issues (beginning August 1993)

Individual Price (U.S.) \$82.50

Individual Price (R.O.W. surface delivery) \$97.50

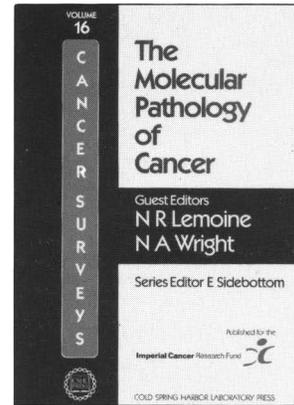

Individual Price (R.O.W. airlift delivery) \$127.50

Institutional Price (U.S.) \$255

Institutional Price (R.O.W. surface delivery) \$270

Institutional Price (R.O.W. airlift delivery) \$300

ISSN 1054-9803

A Co-publication

Cancer Surveys: Advances and Prospects in Clinical, Epidemiological and Laboratory Oncology is published for the Imperial Cancer Research Fund by Cold Spring Harbor Laboratory Press. It provides a comprehensive survey of the present state of, and future developments in, well-defined areas in oncology. Each issue deals with a specific topic and has guest editors with an expert knowledge of the subject.

Topics to be covered in 1994 are:

Volume 19/20: Trends in Cancer Incidence and Mortality (double issue)
Volume 21: Palliative Medicine

These issues can be ordered directly from Cold Spring Harbor Laboratory Press by subscription (\$216, plus \$25 airmail delivery) or individually (\$72, plus \$4.50 surface delivery or \$12 airmail delivery).

ISSN 1050-849X

Learning & Memory will publish experimental studies in humans and animals on cognition, behavior, development, neuropsychology, neurophysiology, biochemistry, cell biology and genetics. This new journal will contain peer-reviewed research papers, commissioned reviews and commentaries, theories and models, and short communications and letters.

Volume 1, 1994, containing 6 bimonthly issues

Individual Price (U.S.) \$85

Individual Price (R.O.W. surface delivery) \$100

Individual Price (R.O.W. airlift delivery) \$130

Institutional Price (U.S.) \$190

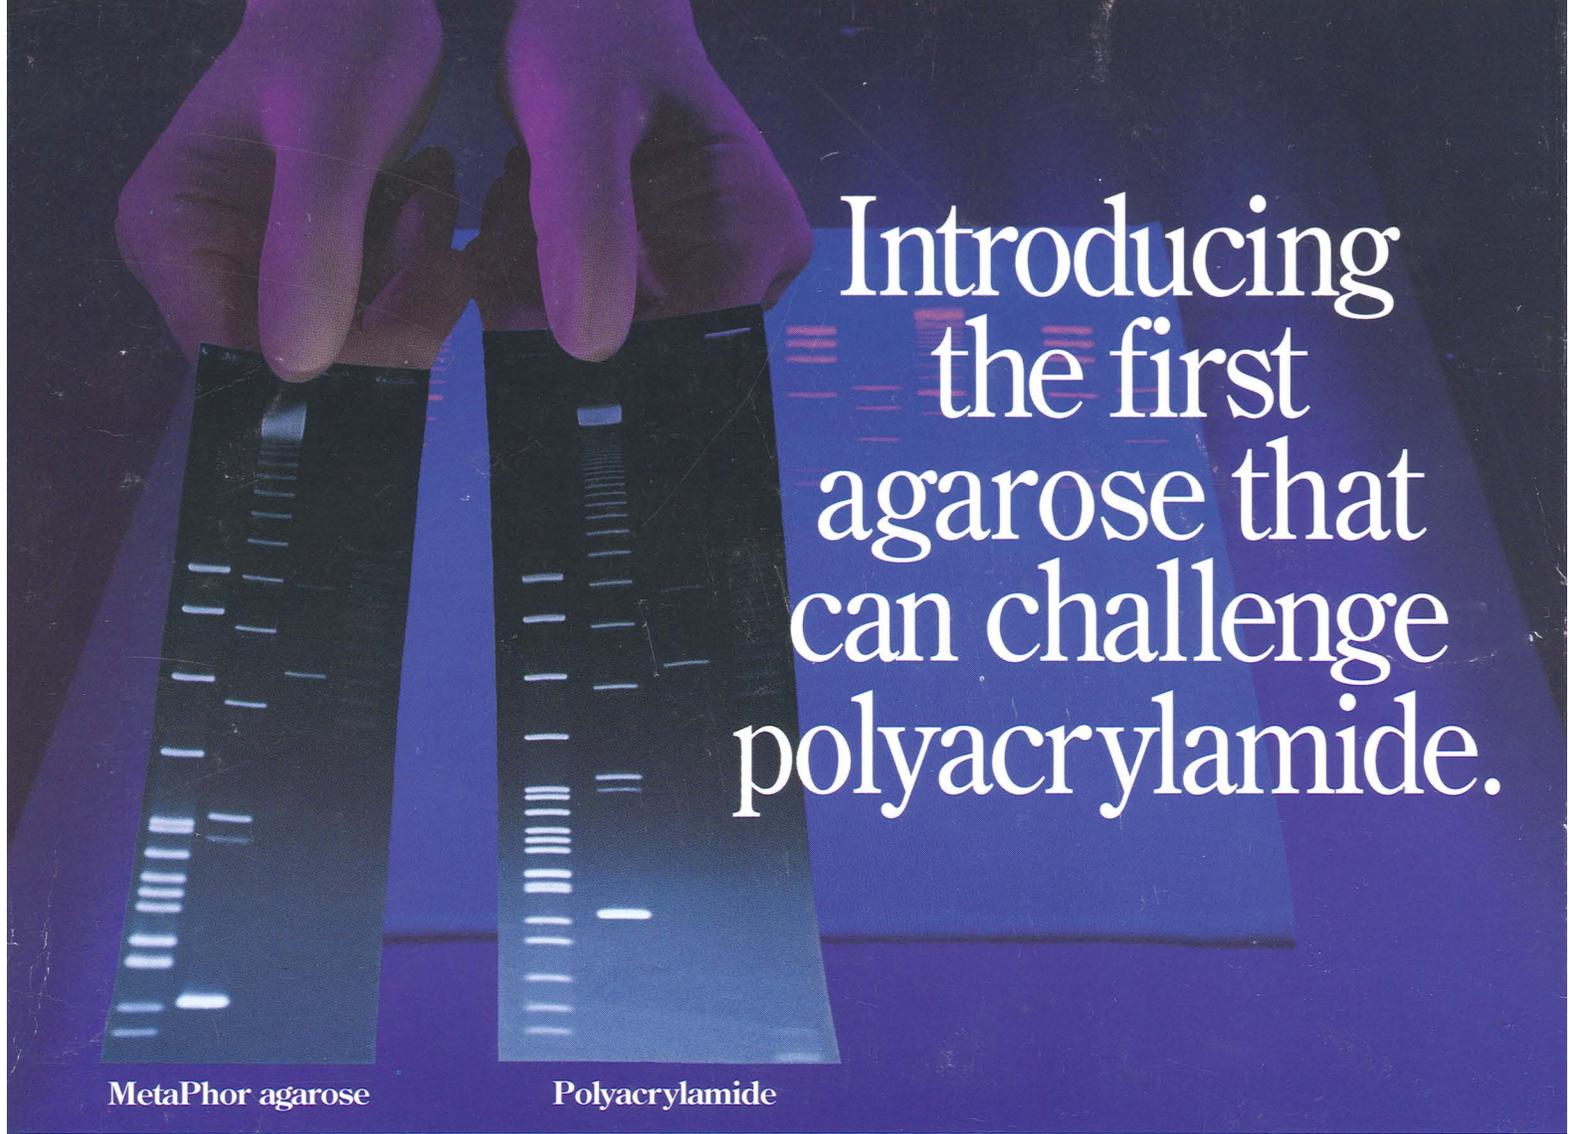

Institutional Price (R.O.W. surface delivery) \$205

Institutional Price (R.O.W. airlift delivery) \$235

Introducing the first agarose that can challenge polyacrylamide.

MetaPhor agarose

Polyacrylamide

Until now, when you wanted the finest resolution of PCR* products and small DNA fragments (less than 800 bp), you probably made a polyacrylamide gel. Preparing that gel, however, was tedious and time-consuming.

MetaPhor™

But now there's something better. It's a new kind of agarose that not only offers speed and convenience, but also has twice the resolution capabilities of any other agarose. It's new MetaPhor™ agarose from FMC.

In fact, as you can see from the above results, MetaPhor agarose gives you resolution so fine (down to a 4 bp difference) that it rivals polyacrylamide. And we think that makes it a clear winner.

Just dissolve MetaPhor agarose in 1X TBE buffer, cast and chill the gel in your submarine chamber, load your samples, and go. It's as easy as that.

So take the MetaPhor challenge, and see how our new MetaPhor agarose performs. When you do, you'll understand why scientists who want the best go straight to the source. To learn more, or to place your order, call us today at **800-341-1574**.

FMC®

Go straight to the source.

For Research Use Only. Not for use in diagnostic procedures.
