

The gold standard, transformed

Chromium Single Cell Gene Expression Flex

Go where single cell RNA-seq has never gone before, with advanced chemistry that provides our most sensitive whole transcriptome profiling and the ultimate flexibility to run samples on your schedule. With this powerful assay, you can:

- Store and transport samples without losing data quality
- Batch and multiplex to reduce per-sample costs by up to 75%
- Bring robust profiling to fresh or fixed samples, even FFPE tissue

DNA METHYLATION CONTROLS

Keep Your DNA Methylation Experiments in Control

AVAILABLE CONTROLS

- High or Low Methylated DNA
- Methylation Calibration Standards
- Human, Mouse, Rat, Monkey, and Custom-Made Controls

DNA METHYLATION ANALYSIS

Targeted Bisulfite NGS (tNGBS)

- Single base-pair resolution
- Provide β -value methylation results
- High coverage with average >500x and a minimum 100x

Pyrosequencing Methylation Analysis

- Quantitative, accurate, and cost-effective

DNA METHYLATION ASSAY KITS

Line-1 Global Methylation Assay

- Represents ~17% of the human genome
- Serves as global methylation markers
- Compatible: MS-HRM, tNGBS, and Pyrosequencing

Foxp3 Methylation Assay Panels

- Quantify methylation levels in Treg signature genes, including Foxp3, CTLA4, IL2RA (CD25)
- Compatible: MS-HRM, tNGBS, and Pyrosequencing

Dharmacon™ Reagents

Infinite reliability for functional genomics

Understanding functional genomics is critical to advance genetic research and therapeutic discovery. Dharmacon Reagents support researchers on this journey at the DNA, RNA, and protein level with the broadest range of functional genomic tools including industry leading gene modulation and gene editing solutions to help elucidate complex biological networks for functional genomic studies.

Known for almost **30 years as premier providers** of synthetic oligonucleotides, Dharmacon Reagents were the first to offer algorithm designed **synthetic siRNA for RNAi**, and the **first to offer guide RNA for CRISPR-Cas9 gene editing** applications.

Dharmacon Reagents have you covered with a complete range of genomic solutions from single-gene experiments to whole genome screens facilitating advancements in genetic research and therapeutic discovery.

NGS library prep? We've got you covered.

For 13 years, NEB[®] has addressed library prep challenges by offering solutions that streamline workflows, minimize inputs, and improve library yield and quality. In fact, use of NEBNext[®] reagents has been cited in >20,000 publications.

With over 90 products in the NEBNext portfolio and direct access to experts in NGS and enzymology, NEB can support library preparation for all of your sample types, for a wide range of sequencing platforms and throughputs.

The NEBNext Ultra[™] II workflow, which lies at the heart of the NEBNext library prep solution, is available in a variety of streamlined and convenient kit formats. For added flexibility, NEBNext kits are easily scalable for automation on liquid

handling instrumentation. As a reagent manufacturer, NEB is ideally positioned to support your large volume and custom needs through our OEM & Customized Solutions group.

Our expertise, proven track record and depth of portfolio make NEBNext a preferred choice for high-quality sample preparation. We're ready to show you why it should be yours.

Interested in giving NEBNext a try? Learn more and request a sample at [NEBNext.com](https://www.neb.com).

AACR American Association
for Cancer Research®

2023 SCIENTIFIC CONFERENCES

Presenting the most significant research on cancer etiology, prevention,
diagnosis, and treatment

Advances in Kidney Cancer Research

June 24-27, 2023 | Austin, TX

Conference Cochairs: Othon Iliopoulos, M.
Celeste Simon, Cheryl Lyn Walker, and
Qing Zhang

Second JCA-AACR Precision Cancer Medicine International Conference

June 28-30, 2023 | Kyoto, Japan

Conference Cochairs: Hiroyoshi Nishikawa
and Charles Swanton

AACR-AHNS Head and Neck Cancer Conference: Innovating through Basic, Clinical, and Translational Research

July 7-8, 2023 | Montréal, QC, Canada

Conference Cochairs: Joseph A. Califano,
Maura L. Gillison, Sana D. Karam, and
Jose P. Zevallos

Molecular Biology in Clinical Oncology Workshop

July 16-22, 2023 | San Diego, CA

Workshop Director: Ross L. Levine
Workshop Codirectors: Christine M. Lovly and
Jean Y. Tang

ASCO/AACR Methods in Clinical Cancer Research Workshop

July 23-29, 2023 | La Jolla, California

Workshop Codirectors: Manuel Hidalgo, Julie M.
Vose and Thomas M. Braun

CRI-ENCI-AACR Seventh International Cancer Immunotherapy Conference: Translating Science Into Survival

September 20-23, 2023 | Milano, Italy

Conference Cochairs: Pier Francesco Ferrucci,
Christoph Huber, Padmanee Sharma, and
Arlene H. Sharpe

Pancreatic Cancer

September 27-30, 2023 | Boston, MA

Conference Cochairs: Christine A. Iacobuzio-
Donahue, Anirban Maitra, Rosalie C. Sears
and Jen Jen Yeh

The Science of Cancer Health Disparities in Racial/Ethnic Minorities and the Medically Underserved

September 29–October 2, 2023 | Orlando, FL

Conference Cochairs: Ronny A. Bell, Gloria D.
Coronado, Sophia H. L. George, Augusto C.
Ochoa, Renee Reams, and Tiffany A. Wallace

Tumor Immunology and Immunotherapy

October 1-4, 2023 | Toronto, ON, Canada

Conference Cochairs: Philip D. Greenberg,
Pamela S. Ohashi, Andrea Schietinger, and
Mario Sznol

Ovarian Cancer

October 5 - 7, 2023 | Boston, MA

Conference Cochairs: Frances R. Balkwill,
Benjamin G. Neel, Kunle Odunsi and Elizabeth
M. Swisher

AACR-NCI-EORTC International Conference on Molecular Targets and Cancer Therapeutics

October 11-15, 2023 | Boston, MA

Conference Cochairs: Timothy A. Yap, Tim F.
Greten and E.G. Elisabeth de Vries

AACR-KCA Joint Conference on Precision Medicine in Cancer

November 15-17, 2023 | Seoul, South Korea

Conference Cochairs: Tae Min Kim and
Elaine R. Mardis

Validate Drug Targets with Speed and Confidence
with Synthego's Engineered Cell Libraries

synthego.com/cshl-cell-libraries

UltraMAB[®]

Ultra-specific ANTIBODIES

Validated against > 10,00 human antigens

ULTRA-SPECIFICITY

Through the use of high-density protein microarray technology, OriGene developed a new generation of monoclonal antibodies for use in IHC and pathology.

WHAT ARE ULTRAMAB'S?

UltraMAB monoclonal antibodies are the industry's only specificity-verified reagents validated against >10,000 human protein antigens. These unique tools are produced from mammalian protein antigens and quality is checked for specificity, guaranteeing superior performance and exclusive specificity to their intended target.

APPLICATIONS

Validated for application like 10K chip, IF, IHC, WB, LMNX, ICC, ISH
