## Corrigendum

---

**Genome Research 11:** 547–554 (2001)

**Comparing Genomes within the Species *Mycobacterium tuberculosis***

Midori Kato-Maeda, Jeanne T. Rhee, Thomas R. Gingeras, Hugh Salamon, Jorg Drenkow, Nat Smittipat, and Peter M. Small

The authors regret that Table 2 (shown on page 550) contained errors in the body and footnote, as follows:

The double dagger symbol (‡) shown following DS7 in the Deleted Sequence column, should instead follow DS71.

The table footnote for the above symbol says “Another isolate had a deleted sequence in the same deletion loci but with different length: DS7a had a length of 517 bp.” This sentence should instead read “Another isolate had a deleted sequence in the same deletion loci but with different length: DS71a had a length of 517 bp.”
