A horizontal banner advertisement with a teal background. On the left, the text "CRISPR and RNAi Genetic Screening. Your new superpower." is written in white. In the center, there is a white rectangular button with the text "LEARN MORE". On the right, there is a photograph of a woman wearing a red superhero mask and a red cape, and the Cellecta logo, which consists of a green molecular structure and the word "CELLECTA" in white capital letters.

Genome Research 21: 377–389 (2011)

Bubble-chip analysis of human origin distributions demonstrates on a genomic scale significant clustering into zones and significant association with transcription

Larry D. Mesner, Veena Valsakumar, Neerja Karnani, Anindya Dutta, Joyce L. Hamlin, and Stefan Bekiranov

In the legend to Figure 1, some elements were incorrectly identified. The second sentence of the legend should read as follows:

(A) Frame 1 illustrates the principle of the bubble-trapping procedure, with agarose (Ag) indicated by the network, bubbles (Bb) indicated in green, and single forks (Fk), termination structures (X), and linear fragments (L) indicated in red.

The authors apologize for any confusion this may have caused.
