

Sequence IDs included in CCDS 19873.1

Original	Current	Source	Nucleotide ID	Protein ID	Status in CCDS	Seq. Status	Links
		EBI,WTSI	ENSMUST00000016647	ENSMUSP00000016647	Accepted	alive	   
		NCBI	NM_025652.2	NP_079928.1	Updated	not alive	   
		NCBI	NM_025652.3	NP_079928.2	Pending	alive	   

Chromosomal Locations for CCDS 19873.1

On '+' strand of Chromosome 5 (NC_000071.5)

Genome Browser links:   

Chromosome	Start	Stop	Links
5	147764832	147764883	   
5	147765424	147765653	   
5	147766700	147766759	   
5	147766944	147767111	   

CCDS Sequence Data

Blue highlighting indicates alternate exons.

Red highlighting indicates amino acids encoded across a splice junction.

Mouse over the nucleotide or protein sequence below and click on the highlighted codon or residue to select the pair.
