Chaerkady *et al*., 2011. A proteogenomic analysis of *Anopheles gambiae* using high-resolution Fourier transform mass spectrometry

Contribution of proteomic data to VectorBase

VectorBase is an annotated genome data platform for several vectors such as *Anopheles gambiae*, *Aedes aegypti*, *Culex quinquefasciatus*, *Ixodes scapulas* and *Pediculus humanus.* The peptide data derived from our mass spectrometric analyses was aligned to the genome map of *Anopheles gambiae* in VectorBase using a Distributed Annotation System (DAS) (Dowell et al. 2001). The DAS server allows integration of various data sources like proteomic data onto the reference genome sequences. The entire peptide data from our experiment can be viewed as separate tracks on VectorBase genome browsers with the URL "http://funcgen.VectorBase.org/gdav/das" as DAS server and "JHU_Ag_v2" as the data source. The tracks for our data (under Protein alignments) on VectorBase genome browser as can be turned on at "configure this page" under "External data sources" utility.

Lib Name: Anopheles gambiae Adult female malpighian tubule
Organism: Anopheles gambiae
Strain: Keele
Sex: Female

Organ: Malpighian tubule
Tissue type: Malpighian tubule
Develop. stage: Adult
Description: cDNA was synthesized from total RNA isolated and fragments amplified by PCR

SUBMITTER
Name: Akhilesh Pandey
Institution: McKusick-Nathans Institute of Genetic Medicine, Johns Hopkins University,
Address: 527 Broadway Research Building, 733 N. Broadway, Baltimore, MD 21205, USA
Tel: 410 502 6662
Fax: 410 502 7544
E-mail: pandey@jhmi.edu

CITATIONS
Title: A comprehensive proteomic analysis using high-resolution mass spectrometry to annotate Anopheles gambiae genome
Authors: Chaerkady,R., Kandasamy,K., Patankar,N., Dwivedi,S.B., Kelkar,D.S., Kim,M.S., Mlambo,G., Okulate,M., Kumar,N., Pandey,A.
Year: 2009
Status: Unpublished
