

Supplementary Figure. Distribution of the major *M. tuberculosis* lineages and clades across Samara.

Maps show the location of Samara Oblast within the Russian Federation (a), Samara Oblast; the location of Samara City is marked with a triangle (b), and Samara City (c). The charts show the location of the clinics recruiting patients and the proportion of isolates from each belonging to clade A (blue), clade B (red), other Beijing types (green), and other lineages (purple). The area of pie charts is proportional to the number of cases.
