

Search for mutations in mmp strains wild isolates

Mutations in *C. elegans* genes

Enter a comma separated list of gene and/or sequence names (e.g. *unc-6*, F15B9.7). Wildcards (e.g. *unc-**) are supported.

Show only mutations affecting the following domain(s)

(enter one or more domain abbreviations, see column 'domain affected' in the output table)

 suggest domains

Mutations in a chromosomal region

Chromosome (e.g. III, X) from to

Mutations in strains

Enter one or more strain names (e.g. VC20167, VC20124)

Mutations in *C. elegans* homologs of human genes

Enter a comma separated list of Ensembl IDs of **human** genes (e.g. [ENSG00000335203](#)).

Output options

web page text only

Sort by sequence name gene name strain allele position

show Grantham and conservation scores

show Ensembl IDs of human homologs

Show mutations affecting
