

*Annotation at DNA level*

*- Origin of DNA variation*

VariO:0128 variation affecting DNA

VariO:0129 DNA variation type

VariO:0127 DNA variation origin

VariO:0130 DNA variation of genetic origin

*- DNA variation classification*

VariO:0128 variation affecting DNA

VariO:0129 DNA variation type

VariO:0322 DNA variation classification

VariO:0135 DNA chain variation

VariO:0136 DNA substitution

VariO:0316 transversion

*Annotation at RNA level*

*- Origin of RNA variation*

VariO:0297 variation affecting RNA

VariO:0306 RNA variation type

VariO:0324 RNA variation origin

VariO:0307 RNA variation of genetic origin

*- RNA variation classification*

VariO:0297 variation affecting RNA

VariO:0306 RNA variation type

VariO:0328 RNA variation classification

VariO:0312 RNA nucleotide substitution

VariO:0308 missense variation

*- RNA variation classification*

VariO:0297 variation affecting RNA

VariO:0306 RNA variation type

VariO:0328 RNA variation classification

VariO:0312 RNA nucleotide substitution

VariO:0316 transversion

*- RNA variation classification*

VariO:0297 variation affecting RNA

VariO:0306 RNA variation type

VariO:0328 RNA variation classification

VariO:0317 initiation codon change

*Annotation at protein level*

*- Origin of protein variation*

VariO:0002 variation affecting protein

VariO:0012 protein variation type

VariO:0324 protein variation origin

VariO:0013 protein variation of genetic origin

*- Protein variation classification*

VariO:0002 variation affecting protein

VariO:0012 protein variation type

VariO:0325 protein variation classification

VariO:0240 missing protein
