

Sexton et al. _ Supplementary Figure 1

Supp. Fig. 1. Measured nucleosome distributions of pairwise comparisons of the 0 hours, 6 hours, 12 hours, 24 hours, and 48 hours for all genes tested. The x-axis represents genomic position showing 2 kb centered on a TSS. The y-axis is the \log_2 ratio of nucleosomally protected DNA to genomic DNA signal at each probe on the microarray. Supp. Fig. 11 is attached as a pdf file.
