

Supplemental Figure S6: *E. lutescens* Y-derived gene expression

Real-time quantitative RT-PCR on RNA isolated from ovary (ov), testes (te), and female and male liver (Li F, and Li M, respectively) for the *E. lutescens* homologs of mouse *Eif2s3y* (blue), *Zfy* (red), *Usp9y* (green), and *Ssty* (purple). Values are normalized to *Actin*, and error bars indicate s.d. values from two separate animals.
