

Supplemental Fig S17. Comparison of Mutinack duplex substitution disagreement spectra and VarScan 2, MuTect 1, or MuTect 2 mutation spectra.

Disagreement spectra (a) are the same as shown in Supplemental Fig S7a except for collapsing that allows for comparison with VarScan 2 (b), MuTect 1 (c), or MuTect 2 (d) spectra; left column: filtering based on distance to ligation site, right column: no filtering.
