

**A****B**

**Figure S4. Realtime PCR results for *AFMID<sub>Total</sub>* and *AFMID<sub>FL</sub>* in 20 adjacent normal livers and 19 HCCs.** *AFMID<sub>Total</sub>* was using the primer targeting exon 3 and exon 4 whereas *AFMID<sub>FL</sub>* was targeting exon 7 and exon 8.  $\Delta Cq$  values were normalized to *HPRT* by  $\text{mean}(Cq_{HPRT}) - \text{mean}(Cq_{AFMID})$ .
