

Supplemental Figure 10. PR curve and ROC curve comparison of different methods using CRISPRn-A375 dataset from Sanson et al. (2018). (A) PR curves for each method. A bracket-surrounded number right to a name of the method indicates AUC of the corresponded PR curve of the method. (B) ROC curves for each method. A bracket-surrounded number right to a name of the method indicates AUC of the corresponded PR curve of the method.
