

Supplemental Fig. S14. PSEP1 OE lines grown on BCD medium with 0.5% glucose for 4 weeks: A – wild type; B, C, D – independent overexpression lines. PSEP3 OE lines grown on BCD medium with 0.5% glucose for 3 weeks: E – wild type; F – empty vector control; G, H – independent overexpression lines. PSEP3 OE lines grown on BCDAT medium for 3 weeks: I – wild type; J - empty vector control; K, L - independent overexpression lines. PSEP25 OE lines grown on BCDAT medium for 3 weeks: M – wild type; N - empty vector control; O, P - independent overexpression lines. Scale bar: 1 cm.
