

**Figure S5. *RPL41* was downregulated in *HOTAIR* RE KO cells.** RT-qPCR analysis of *RPL41* in wild-type U251 cells and *HOTAIR* RE KO cells treated with or without TMZ (1mM, 72h). Data represents means  $\pm$  S.E.M. of three independent experiments. \*p<0.05, \*\*p<0.01, \*\*\*p<0.001 compared with corresponding Ctrl cells.
