

**Supplemental Figure S28.** RH growth genes are relatively poorly studied. (A) RH coding region (cr) growth genes have fewer PubMed entries in the GeneRIF database than non-growth genes. Means  $\pm$  s.e.m. (B) Significance of decreased publication numbers for RH cr growth genes. (C) RH cr growth genes have fewer entries in the Reactome database than non-growth genes. (D) Significance of decreased Reactome entries for RH cr growth genes.
