

Supplemental Figure S34. Close up views of interaction loci. (A) Chromosome 1. (B) Chromosome 7. (C) Locus for KHDRBS2 on Chromosome 6. Horizontal red and black lines, permutation significance thresholds. (D) Sequence read changes on \log_2 scale showing growth at 0 nM paclitaxel for six interaction loci. Colored lines, best fit. Grey bands, 95% confidence intervals. (E) Same loci showing growth at 75 nM paclitaxel. (F) Sequence read changes on \log_2 scale for GRIK3 interaction locus on Chromosome 1. Best fit with drop lines shown.
