Supplemental Figure S9. Mean human DNA retention changes. (*A*) Mean retention changes as a result of growth time, stratified by paclitaxel concentration. (*B*) Mean retention changes as a result of growth time, stratified by pool. (*C*) Mean retention changes as a result of paclitaxel concentration, stratified by growth time. (*D*) Mean retention changes as a result of paclitaxel concentration, stratified by pool. Retention based on mean of sequence alignments and *TK1* corrected for revertants $\pm$ s.e.m.
