

A**B****C**

Supplemental Figure S4: A. Additional examples of dynamic broad H3K4me3 domain loci in normal thymocytes. Legends are as in Figure 1E. **B.** Percentage of overlap between T-ALL tumor suppressors (Supplemental Table S5) and broad H3K4me3 domains found only in thymocytes (specifics) or conserved in other normal tissues (broad present in more than 50% of ENCODE normal tissues, as defined by Chen *et al.* 2015). Two sided Fisher's exact test. **C.** Examples of tumor suppressor genes present in normal thymocytes.
