

**A****B**

**Supplemental Figure S9.** **A.** Expression of regulators from the Chronis et al. data set that associated with prioritized motif features **Figure 4B**). One of the 32 regulator genes (FOXI1) presents no expression. **B.** Multiple related Forkhead Box transcription factors, notably FOXI3, that are significantly expressed and which are mapped to some of the same motifs in Cis-BP, supporting the FOXI1 regulatory feature selection from Sherwood et al. used in the analysis.
