

Fig.S12 Regulatory role of TEs in different tissues of various silkworm strains.

Relative expression levels of enhancer-associated genes and non-associated genes (log-transformed data) in indicated tissues and silkworm strains. Box plots indicated the median (center of box), lower and upper quartiles (bounds of box), minimum and maximum values (bars). Two-tailed *Wilcoxon* rank-sum test; ***P < 10⁻¹⁵ versus TEs.
