Fig.S9 Schematic diagram of constructed plasmids for dual luciferase reporter assay.

(A) Schematic diagram of the internal reference vector pGL4.10-Pie1 harboring the promoter of BmNPV *ie-1* before *luc2*.

(B) Schematic diagram of the vector pNL1.1-Target harboring target promoter and cloned enhancer region for enhancer activity analysis.

(C) Schematic diagram of the vector PB-luc-Zeo used for transposition of the dual luciferase reporter to the genome.
