B

Supplementary_Fig_S11. piC length distribution grouped by piC frequency based on differing overlap requirements. (A) piC length distribution shown for each group of piC frequency (1/8 to 8/8) with minimum overlap requirement of 100bp to be considered as same piC between strains. (B) piC length distribution shown for each group of piC frequency (1/8 to 8/8) with minimum overlap requirement of 1000bp to be considered as same piC between strains.
